Name : SAMUVEL P

Reg.no: 192511280

## EXP 15 : 16. Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM

### Aim:

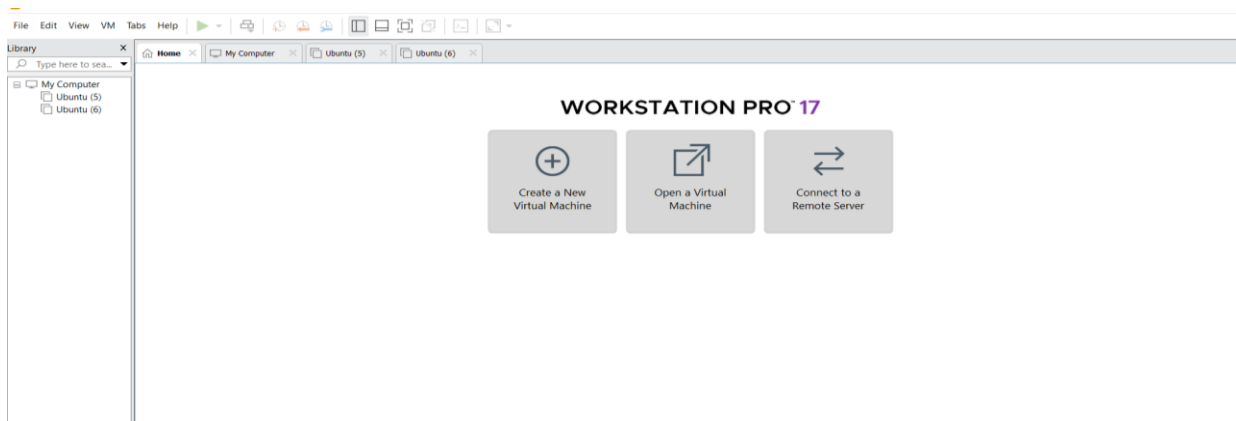

To Create a Cloning of a VM and Test it by loading the Previous Version/Cloned VM.

### Steps:

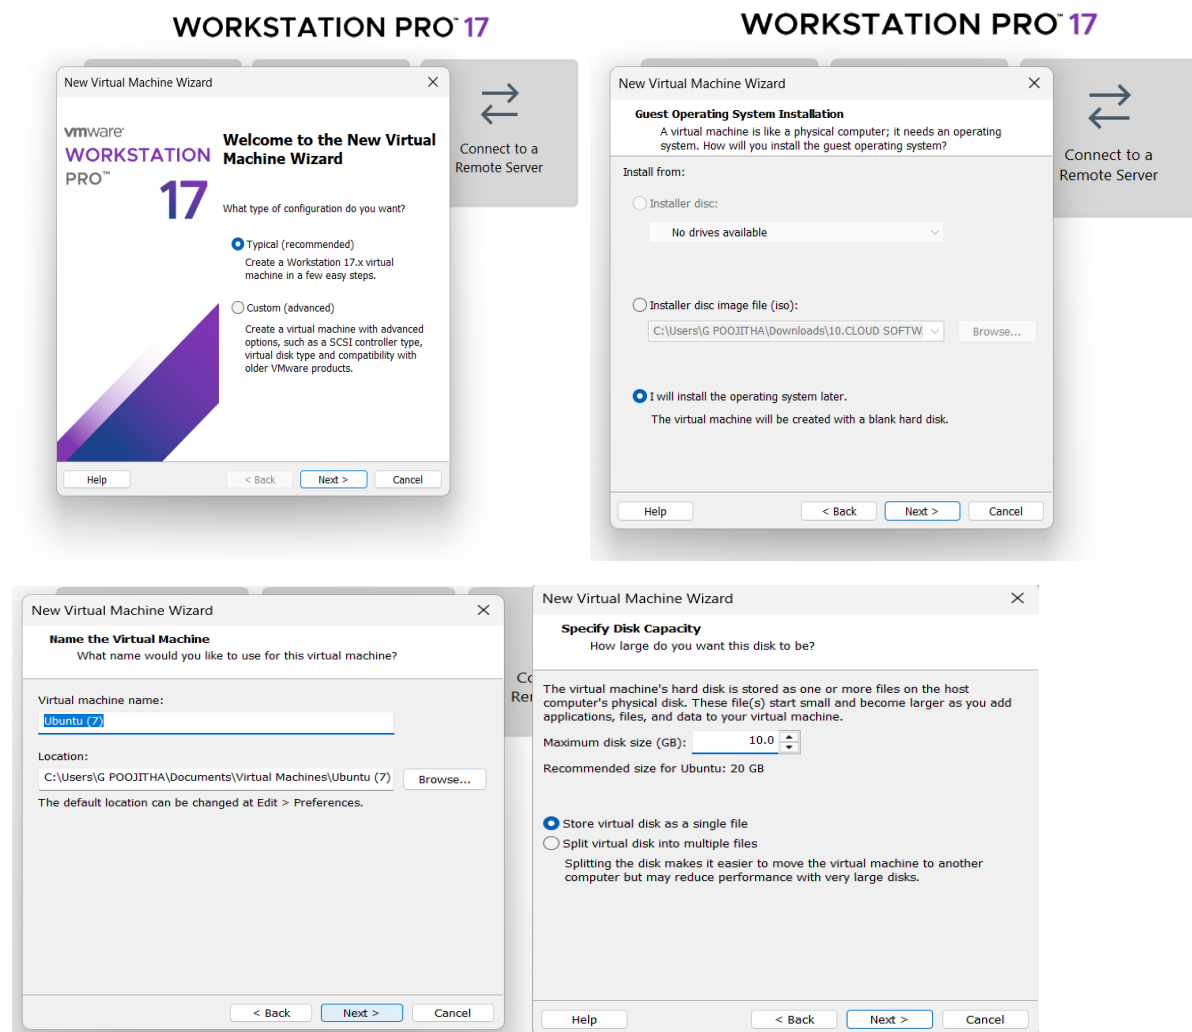

1. Download VMware software and install it as Type-2 Hypervisor.
2. Download Ubuntu or tiny os as ISO image file.
3. In VMware workstation → Create new VM
4. Do the configuration based on given conditions.
5. Create VM
6. Go to VM → Manage → Clone.
7. Launch the VM.

### Implementation:

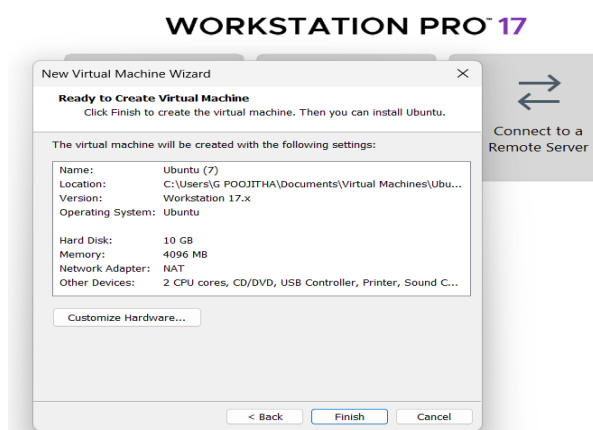

#### 1. Download and open VMware software.

## 2.Create a new VM

Name it anything→click on next→Adjust the size of disk → change the option to first and then click on next.

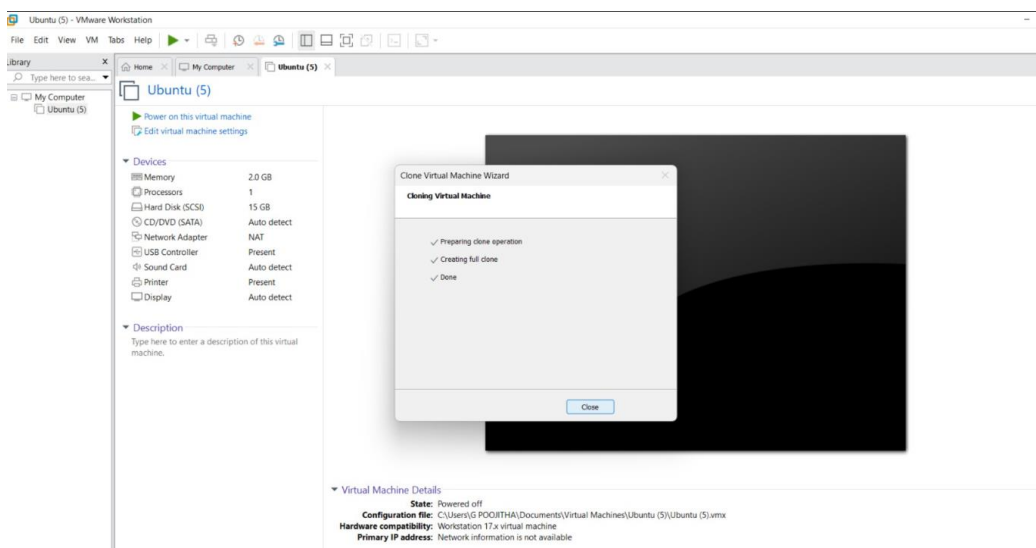

Click on Finish to Launch .

### 3.VM is created

### 4. Create Clone

Clone has Created and it has same properties as before VM.
